

A photograph of a beach at sunset. In the foreground, an orange life preserver with white stripes is mounted on a wooden post. The beach is sandy with many footprints. The ocean waves are breaking on the shore, and the sun is low on the horizon, creating a warm, golden glow. The sky is clear and blue.

Acronis Cyber Protect Cloud

# Acronis Cyber Backup Cloud

## Complete, efficient, and secure data protection for any environment

By combining backup features and anti-ransomware technologies, Acronis Cyber Backup offers the Cyber Protection which today's organizations need to avoid costly business interruptions, dissatisfied customers, and lost revenue. It Supports over 20 platforms, protects any workload, and delivers limitless scalability, saving your money

### Protect the company's most valuable asset with Acronis Cyber Backup Cloud

Acronis Cyber Backup Cloud is a reliable, hybrid cloud backup solution for businesses of all sizes that protects more than 20 platforms, anytime, anywhere and faster than anyone else

#### Protection for any workload

Streamline your data protection efforts using just one solution. We support Windows and Linux servers and VMs, eight major hypervisors, PCs, Macs, iOS, Android, Oracle Database, SAP HANA, Microsoft on-premises and Office 365 apps, and G Suite.

#### Unmatched storage options

Comply with business requirements and regulations by choosing the right storage for your needs. Backups can be stored on premises, in the secure Acronis Cyber Cloud Storage, public clouds, or with a local storage provider.

#### Seamless deployment

Forget about implementation hassles. Acronis Cyber Backup Cloud is a turnkey, all-in-one BaaS solution, with almost no requirements or special prerequisites for customers. Only a lightweight backup agent is needed for installation.

#### Simple pricing with no upfront costs

Eliminate expensive equipment and backup software purchases. With Acronis Cyber Backup Cloud, you can protect your systems and data at an affordable, predictable, monthly rate.

#### self-service web console

Enjoy our solution's web-based, touch-friendly console to access backups and restore files wherever and whenever it's needed. You'll find there's no need to contact MSPs to execute basic tasks.

#### Proactive anti-ransomware protection

Defend your files and backups from ransomware. Traditional backup software is vulnerable to attacks that can delete backup files. Acronis Cyber Backup Cloud shields them with the backup industry's only artificial intelligence-based anti-ransomware technology.

# Acronis

## Cyber Protection

- Secure off-site backup storage
- Hosted self-service management portal
- Full image and file-level backups
- Protection of data on 20+ platforms, including virtual, physical, and cloud-based servers, endpoints, Office 365, and mobile devices
- Customizable policies with backup schedule/frequency and retention rules
- Multiple recovery options: entire machine, ESXi configuration, single files and folders, databases, Office 365 items, etc.
- Customizable compression levels for data being backed up
- AES-256 encryption of backups in transit and at rest
- Recovery to dissimilar hardware, including bare-metal, physical, virtual, or cloud environments
- Proactive, AI-based ransomware protection for Windows machines
- Cryptomining protection

# Backup for Microsoft 365

## Backup for Microsoft 365 Teams

With the Acronis Backup solution, you can easily, securely, and quickly recover entire teams, including the team's name, member list, channels, and content, as well as team mailboxes, meetings, and team sites.

## Backup for Microsoft 365 Exchange Online

Backup, protect, and quickly recover mailboxes, group mailboxes, in-place archives, folders, messages, calendar events, tasks, contacts, journal entries and notes, including the ability to preview content e-mail, download e-mail attachments or send e-mails directly from the backup.

## Backup for Microsoft 365 OneDrive for Business

Protect and flexibly recover your entire OneDrive or specific individual files and folders, including access permissions. To further simplify the recovery process, you can download files directly from the backup and use them immediately.

## Backup for Microsoft 365 SharePoint Online

Back up site collections, group sites (including teams and communication sites), lists, list items and attachments, documents and libraries, site pages and wiki pages, and all Microsoft SharePoint Online access permission settings. Granularly recover all critical items and download files directly from backup if needed.

# Acronis Cyber Protect Cloud

## Activation of services

Activating Acronis backup services is easy and quick, but above all it allows you to take advantage of a **30-day trial period** to access the control panel and all the features and licenses that the solution offers.

Thanks to the trial it will be possible to try, test, and configure all the services of your interest and quantify your cloud space needs for the remote recording and storage of your saves.

At the end of the trial period, it will be possible to keep your profile and activated services or suspend access and functionalities, at no cost.

The activation of Acronis backup services includes:

- Creation of customer data
- Activation of the login account

By activating the account, you get access to the Acronis control panel and you will be able to manage the configuration of your services in complete autonomy to prevent data loss and business interruptions.
